

Radar Risk Assessment

Your Comprehensive Risk Assessment Tool to Empower Sustainable Supply Chains

Radar is a powerful online tool designed to help businesses effectively identify and mitigate key social, environmental, and governance risks across their supply chains. With Radar, businesses can gain a comprehensive understanding of potential labour, human rights, governance, and environmental challenges, enabling them to proactively secure responsible and sustainable supply chains.

By combining inherent risk scoring tools with data collected from supplier sites within the Sedex platform, Radar offers country risk indicators and industry sector insights. This empowers users to navigate supply chain risks effectively. Radar assigns risk scores to 14 key risk topics, such as working hours, forced labour, environmental impact, freedom of association, and wages, using data from reputable sources like the United Nations Development Programme, the International Trade Union Confederation (ITUC), and the International Labour Organisation (ILO).

Contact our team to learn more about how Radar can help your business identify and mitigate key social, environmental, and governance risks.

The tool also automatically combines data from a supplier's Self-Assessment Questionnaire (SAQ) and audit results, providing site-specific risk assessments for enhanced due diligence. Radar further supports users with customisable risk reports, allowing for a more targeted risk assessment approach tailored to specific business needs.

By using Radar, businesses can protect their reputation, meet compliance requirements, and promote social and environmental sustainability throughout their supply chains. It enables proactive risk management by identifying and mitigating key risks, providing data-driven insights to make informed decisions, and ultimately driving positive change.

Our technology products & services

- Radar Risk Assessment
- SMETA Audit
- Self-Assessment Questionnaire (SAQ)
- Analytics and Reporting
- Customer API
- Platform
- Actionable Insights
- eLearning

Benefits

Comprehensive Risk Assessment: Radar enables businesses to identify and mitigate key social, environmental, and governance risks, protecting their reputation and complying with sustainability legislation.

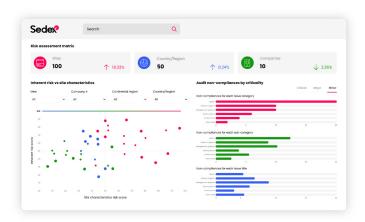

Risk Management: Businesses can proactively address labour and human rights challenges, minimising negative impacts and saving time and costs on compliance with emerging supply chain sustainability regulations.

Data-Driven Insights: Radar provides data-driven insights to navigate supply chain risks, improving overall performance and addressing inefficiencies.

Customisable Reports: Businesses can access customisable risk reports, gaining supply chain visibility and focusing on areas that matter most.

Risk Mitigation: Radar helps identify and mitigate risks, establishing a single source of truth for sustainable supply chain data.

Compliance and Sustainability: Sedex enables businesses to meet compliance requirements, promote social and environmental sustainability, and retain profit from customers with increasing transparency requirements.

About Sedex

Sedex is a global technology company that specialises in data, insights and professional services to empower supply chain sustainability. Our platform, tools and services enable businesses to easily manage and improve their environmental, social and governance (ESG) performance to meet their supply chain sustainability goals.

Sedex has nearly 20 years of expertise and provides end-to-end supply chain solutions for all businesses, including SMETA, our world-leading site-level social audit. We're proud to work with a community of 75,000 businesses and 100,000 supply chain sites across 35 sectors globally. This includes some of the world's most recognisable brands such as Reckitt, Nestlé, Molson Coors, Yum! Brands, Marks & Spencer, Mengniu, Asahi, Li & Fung, John Lewis Partnership (JLP) and Barclays to name a few. Visit our website for more information.
