

Sustainability Roadmap

Your complete solution for sustainability strategy and implementation

The challenge

In today's complex business environment, a fragmented approach to sustainability is no longer sufficient. Organisations face multiple challenges in building effective sustainability programs:

- **Strategic direction:** Fragmented, reactive initiatives without a cohesive strategy
- **Knowledge gaps:** Limited internal expertise to drive effective sustainability programs
- **Leadership alignment:** Difficulty securing buy-in and resources from key stakeholders
- **Regulatory complexity:** Uncertainty about current and emerging ESG requirements
- **Supply chain visibility:** Insufficient understanding of environmental and social risks
- **Implementation clarity:** Lack of structured action plans with clear ownership

Consulting solution & approach

Our Sustainability Roadmap solution delivers a comprehensive strategy that transforms sustainability challenges into business opportunities. Through our structured approach, our expert consultants will:

Create regulatory clarity

We identify potentially relevant regulations for your business and translate complex requirements into clear insights. We provide streamlined information to help your internal teams assess which laws apply, saving them valuable time on research and analysis, so your business can focus on what matters most – implementation and improvement.

Understand your risk landscape and prioritise your efforts

We map ESG risks across your operations and supply chain, conduct in-depth analysis, and establish a foundation for risk-based due diligence aligned with international standards. Our risk analysis establishes a robust foundation for risk-based due diligence, enabling strategic resource allocation for maximum impact and a strategic sustainability approach.

Build internal capability

We deliver targeted training and tools that create a common language and understanding of sustainability across your organisation, empowering teams to identify and act on opportunities.

Develop your strategic roadmap

We provide a structured implementation plan with phased actions, clear ownership, and defined milestones to transform sustainability from aspiration to operation.

Your deliverables

	WHAT YOU RECEIVE	HOW IT HELPS YOU
Regulatory clarity	Legislation Diagnostic Tracker	Customised analysis of relevant laws affecting your business
	Gap Assessment Report	Evaluation of your current practices against your external requirements
	Compliance Roadmap	Implementation plan with actionable steps, timelines and responsibilities
	Regulatory Training	Expert-led guidance on key legislation for your stakeholders
	Credible Sustainability Claims Guidance	Develop authentic communications that avoid greenwashing
Risk management	Industry Risk and Benchmarking report	Compare your position against industry peers and understand sector-specific risks
	Impact Materiality Assessment	Identify your most significant environmental and social impacts to focus efforts strategically
	Mitigation Report	Implement practical steps to address priority risks with clear recommendations
Internal capability building	Sustainability 101 Training	Build a common language and understanding across your organisation
	Executive Presentation	Executive briefing on findings, risks, and opportunities
	Certification Navigation Guide	Benchmarks to help you select appropriate certifications
Implementation tools	Supplier prioritisation recommendations	Focus your due diligence efforts where they matter most
	Strategic Supplier Engagement Model	Framework for enhanced collaboration and data sharing
	Sustainability Policy	Foundational document setting expectations and frameworks
	Sustainability Roadmap	Phased implementation plan with clear ownership

Business impact

Our clients leverage this solution to achieve measurable outcomes:

- **Strategic advantage:** Transform compliance requirements into business opportunities
- **Regulatory readiness:** Prepare for current and emerging corporate sustainability regulations
- **Risk mitigation:** Identify and address environmental and social risks proactively
- **Operational efficiency:** Focus resources where they deliver maximum impact
- **Enhanced reputation:** Build credibility with customers, investors, and partners
- **Supply chain resilience:** Prevent disruptions through better risk management

“

Client perspective

I highly recommend partnering with Sedex...The result was a comprehensive roadmap that not only addressed our compliance needs but also aligned with our values and long-term business strategy. The Sedex team provided valuable insights and recommendations that have allowed us to enhance our approach to social responsibility and sustainability. We look forward to continuing our partnership with Sedex in the years to come.

Enrique Perez, Vice President, Supply Chain & Operations, Chef Works
