

# Sustainability Kick Starter

Understand key risks & build internal and supplier engagement for ESG success

## The challenge

In today's business environment, sustainability is rapidly moving from optional to essential. Many organisations struggle with:

- **Limited expertise:** Insufficient internal knowledge to develop effective sustainability initiatives
- **Organisational misalignment:** Difficulty securing leadership buy-in and aligning teams around priorities
- **Risk blind spots:** Incomplete understanding of sustainability risks across operations and supply chain
- **Supplier engagement gaps:** Weak mechanisms for collecting and managing sustainability data
- **Resource constraints:** Need for cost-effective solutions that deliver meaningful progress

## Consulting solution & approach

Our Sustainability Kick-starter solution goes beyond a risk assessment to build the internal capability and supplier relationships you need for sustainable success. In just 4 weeks, our expert consultants will:

### Build organisational knowledge

We deliver targeted training and tools that create a common language and understanding of sustainability across your organisation, empowering teams to identify and act on opportunities.

### Secure leadership alignment

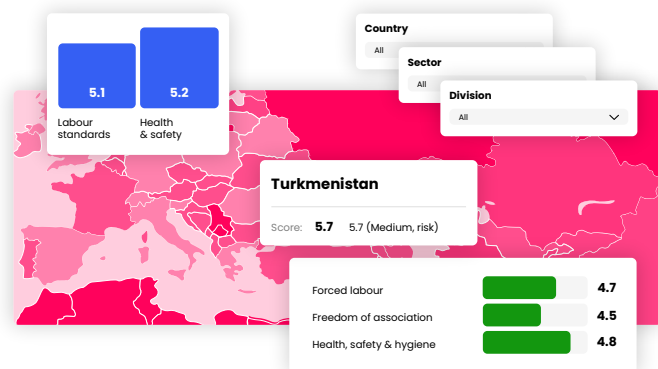

Our evidence-based approach to risk and opportunity analysis provides compelling reasons for leadership to invest in sustainability initiatives with clear business benefits.

### Map your risk landscape

We identify priority areas for immediate action, helping you focus limited resources where they'll have the greatest impact on your sustainability journey.

### Enhance supplier collaboration

Our strategic framework transforms supplier engagement from a compliance exercise to a collaborative approach that improves data quality and strengthens relationships.

Your deliverables

	WHAT YOU RECEIVE	HOW IT HELPS YOU
Risk assessment tools	Industry risk and benchmarking report	Compare your position against industry peers and understand sector-specific risks
	Impact materiality assessment	Identify your most significant environmental and social impacts to focus efforts strategically
	Mitigation report	Implement practical steps to address priority risks with clear recommendations
Knowledge building	Sustainability 101 Training	Build a common language and understanding across your organisation
	Credible sustainability claims guide	Develop authentic communications that avoid greenwashing
	Executive presentation	Secure leadership support with compelling business case

## Business impact

Our clients leverage this solution to achieve measurable outcomes:

- **Strategic direction:** Clear prioritisation of sustainability efforts for maximum impact
- **Internal capability:** Enhanced team knowledge and alignment on sustainability goals
- **Leadership support:** Evidence-based approach to secure executive buy-in and resources
- **Supply chain resilience:** Reduced risk of disruptions through proactive management
- **Compliance readiness:** Foundation for meeting emerging regulatory requirements
- **Resource efficiency:** Focused approach to sustainability that optimises your investment
- **Enhanced collaboration:** Improved supplier relationships and data transparency

“
